

Infantry Training at Camp Parks!

On March 2 Soldiers of B Company 1-184 IN (L) stationed here conducted squad air insertion training at the post helicopter pad with a Blackhawk Helicopter from the California National Guard.

The training started at about 9 a.m. with the Soldiers road marching to the pad and conducting landing zone operations and upload/offload training. They conducted training that involved practicing with loading the aircraft and procedures for offloading while the aircraft is still running.

Prior to going live the pilot and crew talked about loading procedures as well as safety briefings to all the Soldiers participating.

The training consisted of LZ operations and movement to a vehicle extraction point.
